

MOBILE COMMAND SYSTEMS for First Responders

Antares^x - a comprehensive system for performing primary command functions

PRIMARY COMMAND FUNCTIONS

- Establishing and maintaining command and control
- Protecting life and property
- Tracking resources for event use and cost recovery

THE SOLUTION

Antares^x is a system that provides the tools to perform primary command functions. Advanced technology employed within our system supplies the public safety professional and first responder with powerful tools to achieve true command and control. Antares^x is extremely user friendly, compact, operates under low power, and is upgradable and expandable.

Integrated within our First Response Mobile Command Vehicle, Mobile Command Center (trailer) or E.O.C. are tools that can be used everyday, and be on scene and running in a matter of minutes, immediately providing extensive situational awareness and rapid and vital information for efficient emergency management.

In addition to providing the necessary tools for the use during an incident, the system also assists with post-event recovery of resources, as well as meeting the exacting requirements of both NIMS and SEMS.

THE PRODUCT

Our custom applications provide advanced situational awareness through the use of the following:

- GIS mapping, navigation and tracking
- Incident command management
- Live video recording & streaming
- Tactical planning software with sketch capability
- Local and satellite TV
- Data satellite transmission
- Weather, traffic and aerial data
- Video Conferencing

“Future Concepts mobile command vehicle leads charge in Homeland Security technology.”

—As reported by Yahoo Finance, Google News and the Los Angeles Times

ADVANCED TECHNOLOGY FOR USE BY:

Law Enforcement

Fire Departments

SAR / USAR

HazMat Specialists

Public Utilities

**Environmental Protection
Agencies**

**State, Local and Federal
Agencies**

Border Patrol (ICE)

Port Protection

USES AND IMPLEMENTATIONS

Our system is designed for use by any local, state or federal agency that requires a tactical, strategic or emergency management response to an incident. Examples include terrorist attacks, chemical, biological or radiological hazards, natural disasters, criminal acts (hostage situations, bank robberies, etc.) and other emergencies.

WHAT WE OFFER

At Future Concepts we provide a turnkey solution for the Public Safety Professional.

- Complete hardware and software system integration
- System engineering and customization to your vehicle
- Interoperable with Antares^x Man-portable and Man-wearable products
- Full system training
- 24 hour technical support

SYSTEM VERSATILITY

As designers of rugged computer hardware for the mobile environment, as well as software developers, Future Concepts has designed a Command System that is configurable to a variety of applications. These applications include portable units, rapid response vehicles, command trailers and emergency operation centers.
